

Our Solution

Our solution is to construct a university.

It is to be a university for
imagination, wonder, beauty, truth, and hope.

It is to be a university for
mental expansion and adaptability.

It is to be a university for
the transformation of the mind.

It is to be a university for
the realization of potential and dreams.

It is to be a university for
teaching and learning the lessons of life.

It is to be a university for
inquirers and problem solvers.

It is to be a university that
integrates unity and diversity.

It is to be a university that
lives and enacts
integrity, creativity and excellence.

It is to be a university that
embraces all products of the mind that
enhance the human condition.

It is to be a university that
supports intellectual, cultural and economic prosperity.

It is to be a university that
affirms the dignity of humanity.

It is to be a university that
attracts talent from any part of the world.

It is to be a university that
is a gift to society.

It is to be a university with a
mandate for scholarship and leadership.

Our solution, therefore, is to build
African University.

William Agbor Baiyee
Chairman, African University Initiative
